

N10Z - Dynamic Compression Valve Kit for Xact/AER48 Forks

available for KTM / Husqvarna / GasGas

The thinking technology
N10Z

N10Z - Dynamic Compression Valve Kit

The patent pending **N10Z** technology dynamically/automatically adapts to the riding situation.

The demand of softer or stiffer damping is remotely adjusted on the fly.

The range of action of the damping can be adjusted as usual by using the clicker screw.

- better response characteristic
- no impairment of the bottom out reserves
- traction and sensitivity
- increases driving comfort and safety
- stainless steel piston rod
- easy installation

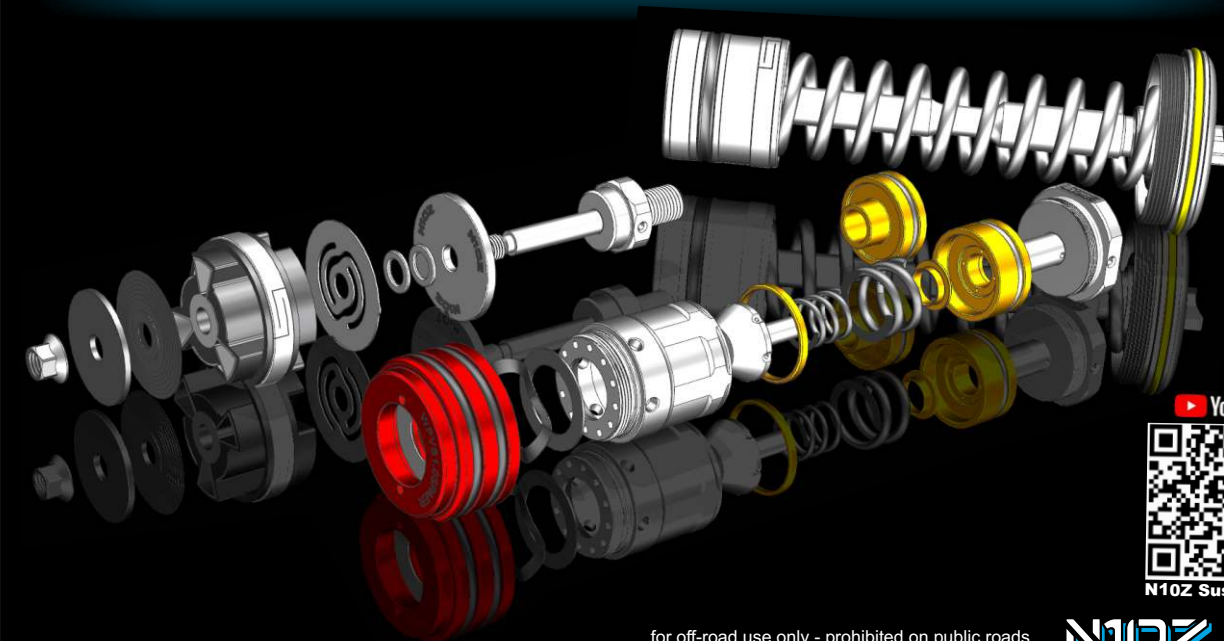

In addition, the kit contains

a **piston rod** made of **stainless steel**.

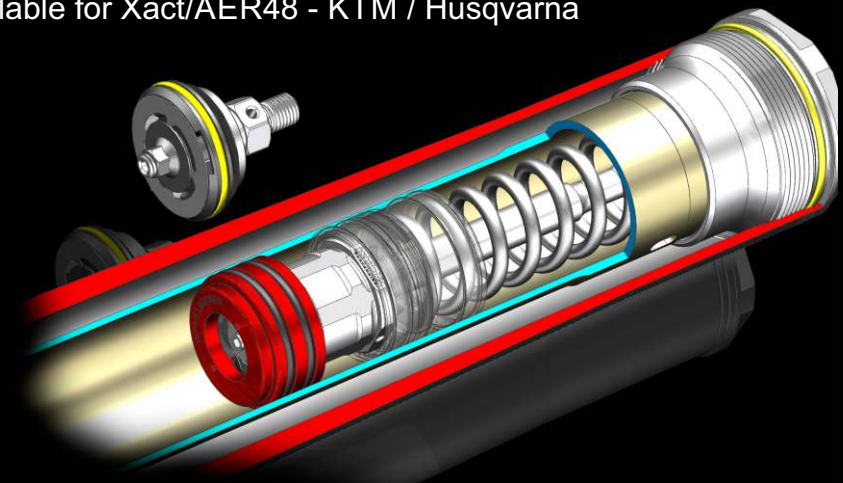

This replaces the OEM aluminum piston rod.

Easy installation by exchanging the original parts.

Available for Xact/AER48 - KTM / Husqvarna

N10Z Suspension

for off-road use only - prohibited on public roads
