

N10Z - Dynamic Valve OC Fork Kit

available for KTM / Husqvarna, BETA (ZF), Sherco (WP)

The thinking technology

N10Z - Dynamic Valve OC Fork Kit

The Converter Kit for Xplor/ZF converts Fork to a full Open Cartridge System. It's the perfect **adjustment option for compressing and rebounding on both sides.**

The patented N10Z technology is also involved in this fork kit, dynamically/automatically adapts to the driving conditions.

- 2x N10Z - Dynamic Valves
- 1x N10Z - Hydro Stop
- 1x Mid-Valve for Compression Side
- 1x Adjuster Needle

The N10Z- Dynamic Valve is controlled by the oil flow/pressure automatically controlled in the damper.

- you get
- more traction and smoothness
 - better bottom out resistance
 - and riding safety
