

N10Z - Dynamic Valve Shock Adjuster

available for KTM / Husqvarna / GasGas / BETA / Sherco(mit WP) Enduro und MX models

The thinking technology
N10Z

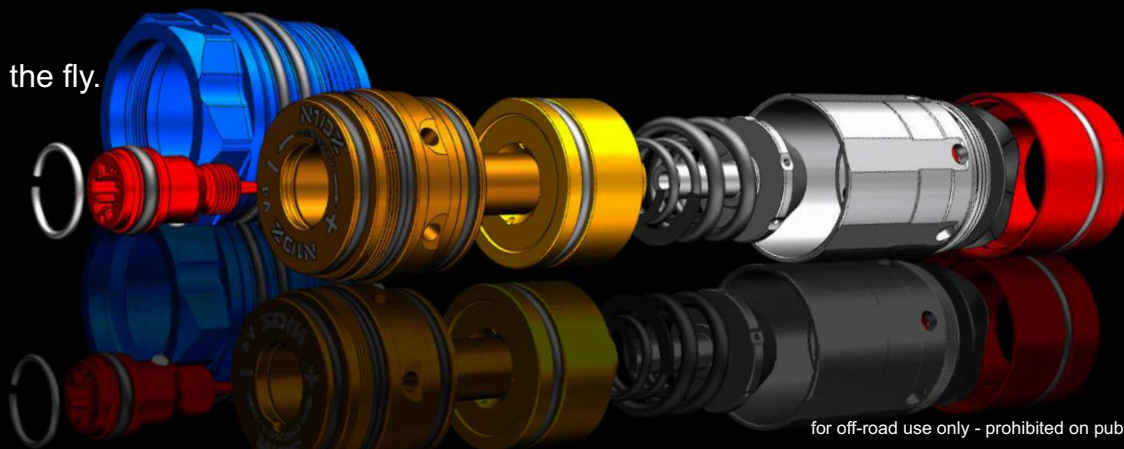

The patent pending **N10Z** technology dynamically/automatically adapts to the riding situation. The demand for a softer or stiffer damping is remotely adjusted on the fly. The range of action of the damping can be adjusted as usual by using the clicker screw.

The N10Z Dynamic Shock Valve adjusts automatically with oil pressure and volume.

you get:

- more traction and smoothness
- better bottom out resistance
- and riding safety

for off-road use only - prohibited on public roads
