

N10Z - Fork Dynamic Valve L.S.O.

available for KTM / Husqvarna, BETA (ZF), Sherco (WP)

The thinking technology
N10Z

N10Z - Dynamic Valve L.S.O. (Left Side Only)

The N10Z – Dynamic Valve (L.S.O.) is installed on the compression side. The N10Z compression adjuster is used on the rebound side for an even more precise setting of the low-speed compression.

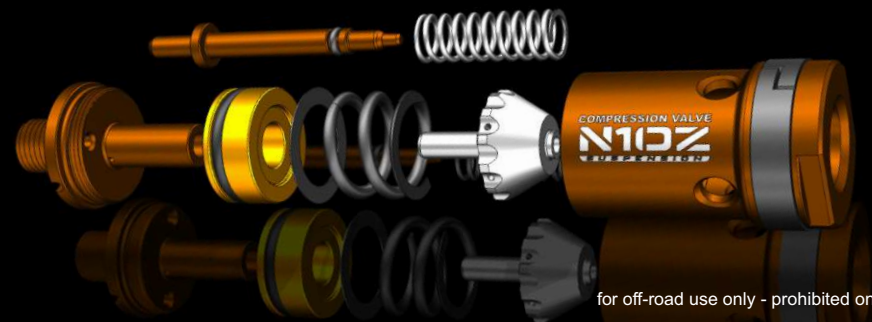

The economical version of the WP Xplor and Sachs ZF (BETA) fork provides more stability and bottom out resistance.

- easy to install
- very efficient
- very good price gain ratio
- perfect option to adjust Compression

The patent pending N10Z technology dynamically/automatically adapts to the driving conditions.

- 1x Dynamic Valve L.S.O.
- 1x Klickerneadle and spring
- 1x Low Speed Compression Adjuster (Rebound Seite)

for off-road use only - prohibited on public roads
