N10Z - Lowering XL HydroStop Kit

The **N10Z- XL HydroStopSystem** is an efficient and affordable solution to use the WP Xplor forks for improved bottom out.

In addition, this kit offers the option of simply changing to lower the fork and damper in 3 stages. Standard springs can be used. The kit contains all necessary lowering components.

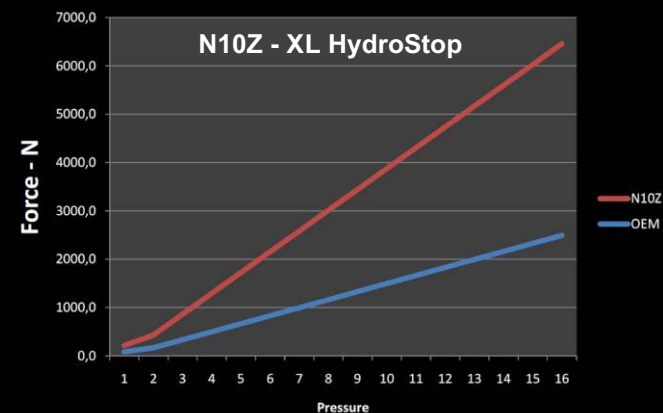

- improved Bottom Out
- Lowering up to -30mm the fork and tail
- for better handling in hard enduro / trail / Supermoto
- smaller drivers -> more safety
- standard OEM springs can be used
- easy installation
- inexpensive

Easy to install by replacing the original parts.

The Kit contains:

- 2x XL HydroStop
- 2x XL Piston
- 6x Spring Spacer
- 2x -10mm (Fork)
- 2x -20mm (Fork)
- 2x -30mm (Fork)
- 1x Shockplate -10mm
- 1x Shockplate -20mm
- 1x Shockplate -30mm

Available for KTM/GasGas / Husqvarna, Sherco(mit WP) Enduro mit WP Xplor Gabeln
