

N10Z - XL HydroStop System for Xplor Forks

is included in the N10Z - Lowering XL HydroStop Kit for Xplor Forks

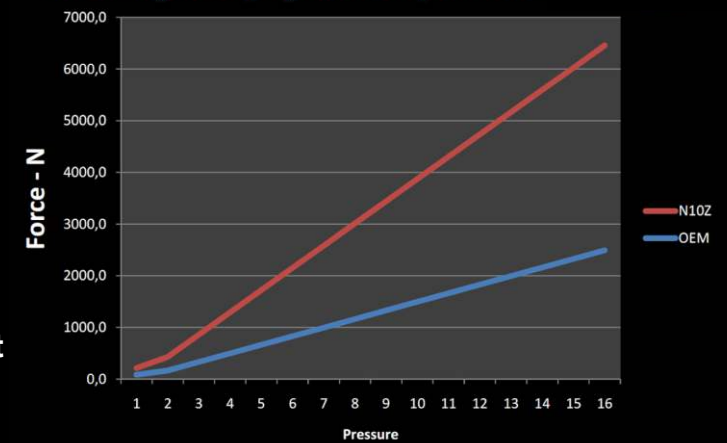

N10Z - HydroStop System

The N10Z - XL HydroStop replaces the standard piston and Hydrostop of the WP Xplor fork. Due to the enlarged piston area, more damping is generated in the last third of the fork stroke, without affecting the rest of the damping.

The **N10Z-HydroStop System** is an efficient and affordable solution to use the WP Xplor forks to improve bottom out.

N10Z - Hydrostop System for Xplor Forks

- more safety
- improved Bottom Out
- efficient
- easy installation
- inexpensive
